

July 6 05

Dear Friends

I'm Writing to you in regards to the Animal ID that we understand you are thinking about making it mandatory. This is to inform you that we are strongly opposed to having a computer chip in our animals. We hope that it will not be enforced. We are afraid it will also be enforced to put the chips in people if it is allowed to put in animals. Our thinking is that a lot of farmers are opposed to it.

Thank you for considering the matter
